PROFESSIONAL SUMMARY

Motivated Data Science student with a strong interest in applying analytical and technical skills to meaningful projects. Looking to grow through hands-on experience and contribute to impactful, data-informed solutions

WORK EXPERIENCE

- Machine Learning Intern– ADITYA UNIVERSITY****[MAY2025– JUNE2025]**
- Developed a face-recognition-based smart attendance system as part of the internship project. Designed to automate attendance logging using webcam input and real-time face detection, effectively eliminating proxy attendance with minimal manual intervention.

TECHNOLOGIES

- Languages:**C,java,python
- Tools:**numpy,pandas,,Git
- Machine learning:** Gained practical experience with supervised and unsupervised learning algorithms.
- Core CS:** Data Structures and Algorithms, OOP, DBMS, Operating Systems
- Other Skills:** Problem-solving, Team collaboration, Presentation skills

PROJECTS

- Fair Price Prediction and Farmer–Consumer Platform****[Live|Github](#)**
- Developed a machine learning model using Linear Regression to predict fair market prices for agricultural produce, helping farmers make informed pricing decisions.
 - Preprocessed historical market data and crop features to train the model, ensuring accuracy and generalizability.
 - Integrated the model into a web platform via Flask and PHP, enabling real-time predictions for farmers through a simple, accessible interface.
- Automated Attendance System****[Live|Github](#)**
- Developed a real-time face recognition system using DeepFace (FaceNet) for automated attendance.
 - Implemented anti-spoofing and location verification to ensure secure, on-campus check-ins.
 - Integrated with backend via Node.js APIs and optimized for live performance

EDUCATION

- | | |
|---|------------------|
| Aditya engineering college(B.Tech in DS) 2023–2027 | CGPA: 8.42 |
| Pragati junior college(MPC in Intermediate) 2021–2023 | Percentage:97.4% |
| Bhashyam public school(Secondary Education) 2020–2021 | Grade points:10 |

SKILLS

- Machine Learning: Comfortable with Python, scikit-learn, and basic model development.
- Problem Solving: Practice regularly on coding platforms with a focus on logic building.
- Communication & Teamwork: Communicate clearly and enjoy collaborative work.
- Creativity: Appreciate clean design, enjoy thinking differently, and solving problems in unique ways
